

I am a Flight Attendant. I feel there is absolutely no benefit in allowing passengers to use their cell phones while during flight.

Here are just a few of the reasons why:

- There is no hard evidence that cell phone use doesn't interfere with navigational instruments.
- Cell phone use would enable terrorists to coordinate a plan of action more effectively.
- The NPRM would leave it up to flight attendants to police the use of cell phones onboard the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations.
- It would make an already tense cabin environment even more stressful.
